

Pioneering management software, ibcs, on target for continued growth in the Science Park and Incubation Industries.

ibcs from **ra** Information Systems sees continual development to cater to the specific needs found within the Science Park and Incubation industries.

Working with leading organisations from both the Incubation and Science Park industries, **ibcs** has been perfectly developed to offer seamless integration between the key management processes associated with the day-to-day running of a Park. Managing enquiries and prospects, license, lease and service charges, meetings, conferences and events, ad-hoc service logging, periodic invoicing, credit control, forecasting and sales analysis, facilities management and document storage are all easily catered for through **ibcs**.

The utilisation of **ibcs** will provide the industries with an important tool, designed to match their specific operational needs. **ibcs** is a comprehensive but flexible software solution, allowing managers to maintain control over their finances and business operations.

Providing these organisations with a centralised management and accounting system, **ibcs** replaces the need for a mix of different software packages, which can often lead to errors, inefficiencies and missed service revenues. This capability ensures reduced overheads, increased productivity and management, allowing managers to focus their efforts on their clients and growing the business, rather than on repetitive administrative tasks.

Noel Kennedy, **ra** Business Development Manager, says "We are very pleased to continue to support the Science Park and Incubation Centre Industries with **ibcs**. We've produced significant results for some of the UK's leading Business Centres for over 10 years now and are looking forward to bringing these capabilities, to work for similar organisations, across different industries."

The **ibcs** modular, management and accounting solutions, are available to any businesses worldwide. Please visit www.ibcs-software.com for further information or contact our office on +44 (0)845 365 10 71 or info@ibcs-software.com.
